

5.0 Megapixel Network Camera

Outline

See the difference multi-megapixel resolution makes!

Lumenera's Le575 series of megapixel cameras are designed for general and high-end security applications.

Lumenera has simplified IP camera installation with a simple plug-and-play process. Intuitive user interface viewed with most web browsers provides standard camera control. Power over Ethernet (PoE) simplifies installation and reduces cabling and installation costs.

Capturing full 2560 x 1920 resolution at 6 fps, these cameras deliver outstanding picture quality and performance. JPEG still-images or live MJPEG streaming video, are provided across a standard 10/100BaseT network interface. Transfer of images via HTTP, RTP/RTSP, or FTP.

The I/O connector provides an interface to an external alarm sensor or control of peripheral equipment such as IR lighting and PTZ. E-mail or UDP alarm notification provides the date, time, and camera IP address. On-board memory buffers supply still images via FTP that precede and follow alarm events.

Programmable day/night settings automatically switch to enhanced low-light mode. Optional – True day/night module provides automatic sliding IR cut filter. When integrated with NIR illuminators, provides outstanding nighttime performance. DC iris lenses are supported using the industry standard four conductor socket.

The user-defined motion detection parameters across multiple zones provide more accurate triggering of alarms, while programmable privacy zones ensure compatibility with all regulations.

The Le575's compact, all-metal body can be mounted stand-alone or by means of standard environmental enclosures. Call with your enclosure requirements today.
